Education

Minerva University — **San Francisco, CA**
B.S. Computational Sciences (Data Science) & Natural Sciences (Matter and Energy) — *Expected May 2029*

Eastern Mediterranean International School — **Ramat Hasharon, Israel**
IB Diploma Programme, GPA: 4.0 | Honor Roll — *Aug 2023 – May 2025*

Experience

Tokyo Metropolitan Government — **Tokyo, Japan**
Consultant, Urban Heat Resilience — *September 2026 – Present*

- Research urban heat challenges and gather requirements by interviewing TMG bureaus, nonprofits, subject matter experts, municipal officials, and residents that will be used to create a future solution proposal.

dreamsedge — **Remote**
Founding Software Engineering Intern — *August 2026 – Present*

- Sole developer for dreamsedge's MVP iOS app, working directly with the founder and product owner.
- Turn product-team specifications into code by configuring the Kiro spec-driven environment with specialist multi-agent AI workflows focusing on comprehensive test suites and QA verification loops.

LakeCloud Metaverse · NVIDIA Inception Program member — **San Francisco Bay Area**
Engineering Intern — *July 2026 – August 2026*

- Built DIANE, a physical voice AI prototype, translating the company president's requirements into software.
- Integrated Raspberry Pi audio, FastAPI, ElevenLabs agents, and LakeCloud's memory APIs; built a RAG pipeline using PostgreSQL and Qdrant, and verified memory recall across physical-device sessions.

Frances Anderson, Inc. — **San Francisco, CA**
Founding AI Engineering Intern — *June 2026 – August 2026*

- Added capabilities to deployed internal and customer-facing Hermes agents; built human-in-the-loop controls, staging, and an eval framework to validate the skills and MCP tools for production readiness.
- Established a spec-driven development workflow for AI coding agents with MCP tools, agent hooks, and verification harnesses; migrated 152 legacy documents into a governed documentation system.
- Worked directly with the CEO and CTO in a three-person team, landing 182 merged PRs across product, backend, and infrastructure; owned 2–3 concurrent features with an average implementation time of 2 days.
- Secured a deployed chef marketplace's database by closing unauthenticated access to four personal-data tables and validating access controls with 339 live policy assertions.
- Built observability with Sentry and privacy-safe LLM telemetry with Logfire tracking models, tokens, latency.

Accomplishments

- Won 1st Place ($2,000) at Google I/O Kickoff: Pre-World Cup Hack, SF (32 teams) for Trash Patrol
- Won 1st Place for Best Use of Kiro in the Deep Agents Hackathon, SF (156 participants) for Scout
- Won 3rd at Physical AI Hack World Tour SF (Founders, Inc.) for training XLeRobot to autonomously flip bread
- Selected among top 25 youth leaders in Poland by Our Future Foundation for a national mentorship program

Skills

- **AI:** OpenClaw, Hermes, MCP, Agent Design, LLM APIs, RAG, LLM Evaluation, Prompt Engineering
- **Frontend:** React, Next.js, TypeScript, Tailwind CSS, Chrome Extensions
- **Backend:** Python, FastAPI, Django, PostgreSQL, Supabase, Linux, VPS, Vercel, Slack API, Qdrant
- **Languages:** Polish & English (native), Chinese & Spanish (conversational), German (elementary)
